## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities:  
Page 1, paragraph [0001], line 2: Applicant should provide the patent number, U.S. Patent No. 6,701,778, in the specification. Appropriate correction is required.

### ***Claim Objections***

2. Claims 1-9, 11-14, and 19-21 are objected to because of the following informalities:  
Re claim 1, claim line 9: The term "adjusts" should be corrected to read -- adjust --.  
Re claim 1, claim line 10: The first occurrence of the article "the" should be deleted.  
Re claim 11, claim line 4: The article "the" should be deleted.  
Re claim 14, claim line 6: The term -- continuous -- has been misspelled.  
Re claim 19, claim line 5: The first occurrence of the article "the" should be deleted.  
Re claim 19, claim line 6: The term -- continuous -- has been misspelled, and the article "the" should be deleted.  
Re claim 19, claim line 7: The second occurrence of the article "the" should be deleted. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 10 and 15-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claims 10 and 15: The claim recites that a coating fluid is tested for runnability; however, the claim recites that acceleration of a continuous stream is calculated with no correlation of how acceleration and runnability are related.

***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter:

Prior art was not relied upon to reject claims 1-21 because the prior art fails to disclose the following:

Claims 1-9 and 11-13: Providing an apparatus or a method for testing the runnability of a coating fluid comprising releasing a continuous stream of fluid from a pressurized container; regulating the flow rate so that the fluid forms in a continuous stream; and measuring the minimal flow rate at which the fluid leaves the opening in the continuous stream in combination with all of the remaining limitations of the base claims.

Claims 10 and 14: Providing an apparatus for testing the runnability of a coating fluid or measuring the acceleration of a fluid comprising means for regulating a flow rate of a fluid through an opening within a pressurized container for creating a continuous stream of fluid falling from the opening; air nozzle means for blowing a stream of gas at the continuous stream at each of two different heights, the air nozzle means comprising two air nozzles; and means for calculating acceleration of the continuous stream as a function of velocity of the stream at two different heights and the spacing between the two heights in combination with all of the remaining limitations of the claims.

Claims 15-18: Providing an apparatus for testing the runnability of a coating fluid comprising means for regulating a flow rate of a fluid through an opening within a pressurized container for creating a continuous stream of fluid falling from the opening; air nozzle means for blowing a stream of gas at the continuous stream at a known distance from the outlet, and means for calculating acceleration of the continuous stream as a function of velocity of the stream in combination with all of the remaining limitations of the claims.

Claims 19-21: Providing a method for measuring acceleration of a fluid comprising releasing a continuous stream of fluid from a pressurized container; horizontally deflecting the continuous stream of fluid by blowing air at the continuous stream at a known height; and calculating the acceleration of stream as a function of the velocity of the stream in combination with all of the remaining limitations of the claims.
